PatientSite

my health journey

## Manage your health care online, anytime at **patientsite.org.**

BIDMC's secure, confidential website helps you play an active role in your health care, whether you use a smartphone, tablet or computer.

### **Find what you need:**

A test result,\* the date of your next appointment, a visit summary, your medication list, a record of your immunizations or patient education.

**Take the next steps:** Email your doctor, nurse or other clinician or their office.\* Request a prescription or referral. Request, reschedule or cancel an appointment.

### **Your notes on PatientSite:**

In 2013, many patients will be invited to read the health care notes their clinicians write after an appointment or discussion. This is taking place in phases. More at **bidmc.org/opennotes**.

*OpenNotes*

To register for PatientSite, ask your clinician – or go to [patientsite.org](http://patientsite.org) and click on "New User."

*\*at the discretion of your clinicians*
